CAREER OBJECTIVE

A Computer Science Student Seeking an entry-level Software or Full-Stack Developer role where I can utilize my skills in Java, MERN Stack and web development to build efficient applications and grow as a software professional.

EDUCATION

B.E Computer Science and Engineering

September 2023-September 2027

-VSB College of Engineering Technical Campus

CGPA:8.25/10.00(till Semester 6)

XII(HSC)

-ST Assisi Matric Higher Secondary School

Percentage:82.1%

X(SSLC)

- ST Assisi Matric Higher Secondary School

Percentage: 100%

SKILLS

Programming Languages : Java

Web Technologies : HTML,CSS, React,Node.js

Databases :MongoDB

Query Language :SQL

Tools :Visual Studio Code, Power BI, Git, GitHub

INTERNSHIP

FULL STACK DEVELOPMENT – S3 Remotica (Quabasclay)

July,2025

MERN STACK –Viruzverse Solution

December,2025

DATA ANALYTICS –Future Inters

January,2026

PROJECTS

EXPENSE TRACKER | MERN Stack, Node.js, Express.js, React, MongoDB

GitHub: <https://github.com/Selvakumaran-2006/Expense-tracker->

- Architected a full-stack expense management system using React for dynamic user interfaces and Node.js/Express.js for robust server-side logic.
- Designed and deployed secure RESTful APIs integrated with MongoDB to execute efficient CRUD operations for real-time transaction tracking.
- Implemented flexible NoSQL document schemas (Mongoose) to securely handle user authentication, budget allocations, and automated expense categorization.
- Optimized frontend state management in React to deliver seamless performance on interactive financial dashboards, reducing manual tracking effort for users.

STUDY PLAN SCHEDULER | Java, Collections Framework

GitHub:<https://github.com/Selvakumaran-2006/Study-plan-scheduler>

- Built a study scheduling application that generates personalized timetables based on subject priority and available study hours.
- Implemented task prioritization algorithms to improve time management.
- Designed an interactive console-based interface for schedule generation and modification.
- Improved study planning efficiency by automating timetable creation.

CERTIFICATIONS

- Data Science for Beginners | Board Infinity | 2026
- Cybersecurity Essentials | Cisco Networking Academy | 2025
- Big Data Computing | NPTEL(Elite) | 2025
- Introduction to IoT | NPTEL(Elite) | 2026
- AI for Beginners | HP LIFE | 2025
- Getting Started with Microsoft Excel | Coursera | 2025

PUBLICATIONS

PATENTS

- Fraud Detection in Voting System Using Hybrid Biometric Scanner
Patent Application Published(India) |AppNo:202541037560A
- Fault Prediction in Computer Using IoT and Machine Learning Algorithms
Patent Application Published(India) |App No: 202541129936A

PUBLICATION

- Legal Status and Liability of Data Brokers and Third-Party Data Processors
International Journal Research Publication Analysis (IJRPA), Volume 1, Issue 7 | Manuscript No:1050

ACHIEVEMENTS

- Solved 460+ coding problems on LeetCode
- 4★ Java in HackerRank
- Published 2 Patent Applications in India
- Published 1 Research Paper in IJRPA Journal

LANGUAGES KNOWN

- Tamil
- English

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.

Date:

Place: Tenkasi, Tamil Nadu

Signature
